

Since 1888, architects, homeowners, universities, commercial and government clients have turned to Ludowici for uniquely beautiful architectural terra cotta products that stand the test of time.

Our clay tiles are the highest quality available, which is why they adorn thousands of historic and newly built structures across the world. Meticulously crafted in our New Lexington, Ohio plant from locally sourced raw materials, our products are infinitely customizable and carry a 75-year warranty.

THE LUDOWICI DIFFERENCE

Built on over 130 years of meticulous craftsmanship and innovation, Ludowici has a long-trusted reputation for developing exceptionally beautiful architectural terra cotta products that last for centuries.

UNMATCHED DURABILITY

Ludowici products last a lifetime in any climate — even the harshest environments — for enduring luxury and beauty that will never fade.

EXCEPTIONAL QUALITY

Ludowici's unmatched materials and processes result in a product that's second to none and delivers a lifetime of beauty.

AFFORDABLE LUXURY

Ludowici has multiple solutions to fit a broad range of lifestyles and budgets.

CUSTOM CRAFTSMANSHIP

Ludowici's product line can be infinitely customized and handcrafted to the finest detail to match any color or fit any architectural style — from modern to old-world.

DOMESTIC PRODUCT

For over 130 years, Ludowici tiles have been made in New Lexington, Ohio, with raw materials sourced just five miles away.

COMPANY LONGEVITY

Our history speaks for itself — homeowners and architects have been trusting Ludowici since 1888.

PERSONAL SERVICE

Every customer receives personal attention and every order is handled with a personal touch.

PEACE OF MIND FOR A LIFETIME

When you choose Ludowici, you are choosing the highest-quality sustainable terra cotta available. In addition, you're working with the most meticulous, proven manufacturer in the terra cotta tile industry – one that stands behind its products for a lifetime – and that brings peace of mind. Ludowici products are nationally and locally certified for durability, moisture resistance, and more. LEED credits are available depending upon project location, color and post-industrial recyclable content of product selected.

75-YEAR MATERIAL WARRANTY

Ludowici roof tiles and floor tiles manufactured in New Lexington, Ohio are backed by a 75-year warranty – unmatched in the industry. This world-class warranty is included in the cost of the terra cotta tile and include color fastness, guaranteeing the roof will remain just as beautiful as the day it was installed.

LEGACY COLLECTION®

Aptly named, Ludowici's Legacy Collection contains more than 40 tile profiles, 58 colors and a variety of textures that have been crafted and perfected over many generations. Since every customer project is unique, the tiles are produced on an order-by-order basis — many by hand. Every aspect of the tile is customizable — color, texture and profile — and every tile is covered by Ludowici's world-class 75-year material warranty. The Legacy Collection is divided into various families such as shingle tiles, barrel tiles and interlocking tiles.

SHINGLE TILES

Ludowici's shingle tiles can be divided into two broad categories based on the aesthetic they exude: Rustic and Formal. With small exposures and unique surface textures, our shingles can be infinitely customized to meet your specific roofing needs.

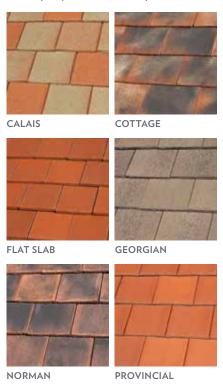

RUSTIC

Inspired by historic regions of England and France, Ludowici's rustic shingles add the rugged warmth and charm of yesteryear to any structure.

FORMAL

Our clean-line formal shingles provide a restrained, timeless elegance that fits with virtually any architectural style.

BARREL TILES

Ludowici offers a wide range of barrel tiles, so called because of their convex barrel-like shape. The tiles are divided into two varieties based on their design origin, Mission and Spanish, and they are fully customizable.

MISSION

Ludowici's Mission tiles faithfully match historic Italian, French, Spanish and Southwestern Mission designs, capturing their romance and beauty.

SPANISH

Its barrel shape and distinctive ripple pattern across the roof make Ludowici's variety of Spanish tiles an enduring favorite.

INTERLOCKING TILES

With graceful proportions and classic aesthetics, Ludowici's interlocking tiles combine an elegant appearance with installation efficiencies. Each tile features different surface textures and interlocking sides, and you can choose from a range of flat and dimensional profiles.

FLAT INTERLOCKING TILES

The timeless elegance of our flat interlocking tiles enhances most any architectural style, while the clean-line design and larger scale allow for efficient installation.

CLASSIC LANAI (2 SIZES) (2 SIZES)

WILLIAMSBURG (2 SIZES)

PROFILE INTERLOCKING TILES

The sculptural fluting of our dimensional profile tiles, also known as French tiles, offers visual drama. Deep channels provide exceptional drainage and the thickness creates a tile of amazing strength.

FRENCH

SHAKE AND SLATE ALTERNATIVES

Some of Ludowici's most popular profiles are wood shake and slate alternatives. These profiles offer the true rustic aesthetic of these materials, yet they require no maintenance and won't rot, warp or fade.

SHAKE INTERLOCKING PROFILES

Ludowici offers two distinct wood shingle alternatives: Century Shake® and LudoShake. Century Shake has a rugged, raised profile appearance. Featuring distinct scoring and a battered butt, LudoShake is a softer scoring and a thinner profile.

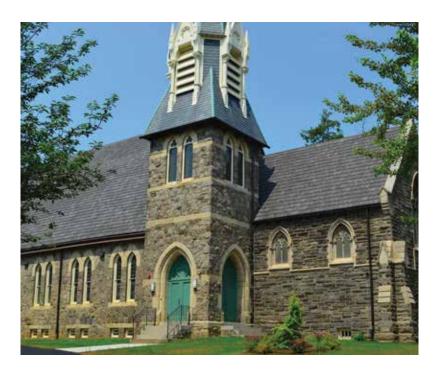

CENTURY SHAKE®

LUDOSHAKE

SLATE INTERLOCKING PROFILES

When choosing a slate alternative, terra cotta slate, like LudoSlate and Lexington Slate®, is the only option that can offer you the same lifespan, durability and beauty of a natural slate. Lexington Slate features a thick, natural quarried slate appearance. LudoSlate, a lightweight terra cotta tile, has a more refined slate appearance with chiseled edges and a thinner profile.

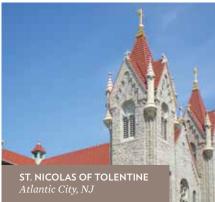

LEXINGTON SLATE®

LUDOSLATE

A TAILORED, POLISHED FINISH

Ludowici offers an array of standard fittings that are manufactured for each style of field tile. In addition, we can create custom, decorative accessories that accent beginnings, ends, and intersections of hips & ridges.

HISTORIC RENOVATIONS

Exquisitely detailed tile profiles and trim parts are a signature element of a Ludowici historic roof. Our massive collection of historical catalogs, drawings and technical guides dating back to the 1800's allows us to identify and create replacement tiles for your historic roof — and replicate them down to the patina. This is true whether your roof contains original Ludowici tiles or those of a long-gone manufacturer, such as B. Mifflin Hood or Heinz.

UNLIMITED COLORS

The color and texture of a roof help tell the story of a structure, so it's important to get it right — especially when historical accuracy must be maintained.

Ludowici is widely accepted as the industry expert in glazed terra cotta tile. With over 50 designer color blends and the ability to custom-match nearly any hue, the color possibilities are endless. Plus, our color glazes are kiln-fired at extreme temperatures during production, fusing the color into the tile and ensuring that the original tones and hues are retained for generations.

STANDARD COLOR BLENDS

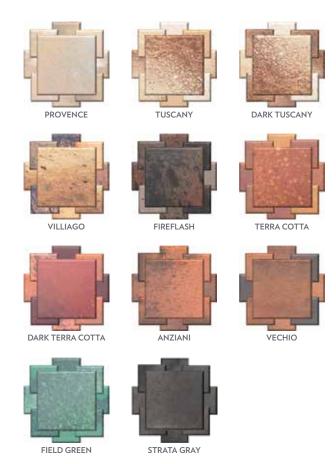

BLENDS

The natural variation produced in our color blends imparts richness and character, adding to the beauty and desirability of Ludowici tile. Not surprisingly, Ludowici is one of the only manufacturers to stand behind the beauty of its tiles by including color in our 75-year material warranty.

IMPRESSIONIST SERIES BLENDS

HAND-FINISHED TEXTURES

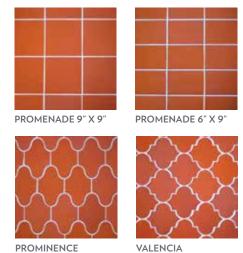

MOTTLED GREEN PURPLE

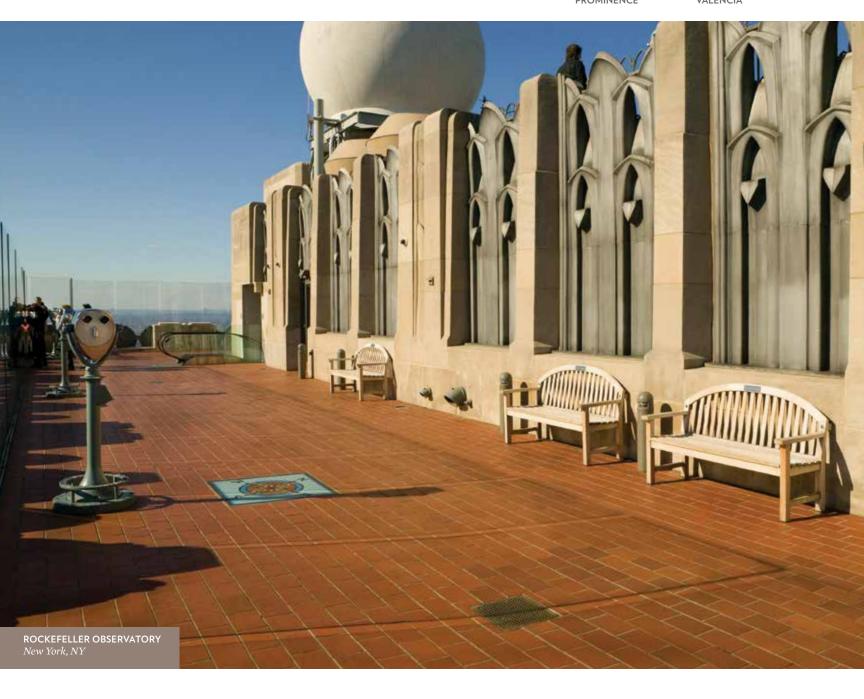

Adding a surface treatment can dramatically alter the tile's appearance and allow you to match the surface of age-old original tiles. Our skilled craftsmen can recreate hand-finishes such as hand-sanding, finger streaks, hand slush or multi-directional scoring and authentically replicate the aging process.

QUARRY TILE FLOORING

Ludowici Quarry Tile can be found at institutions across the country, including the White House and Rockefeller Center. This high-traffic commercial-grade flooring option is made from the same clay and firing techniques as our roof tiles. Available in standard and custom matte colors and smooth or non-skid surfaces, it's suitable for any climate or application and comes with a 75-year material warranty.

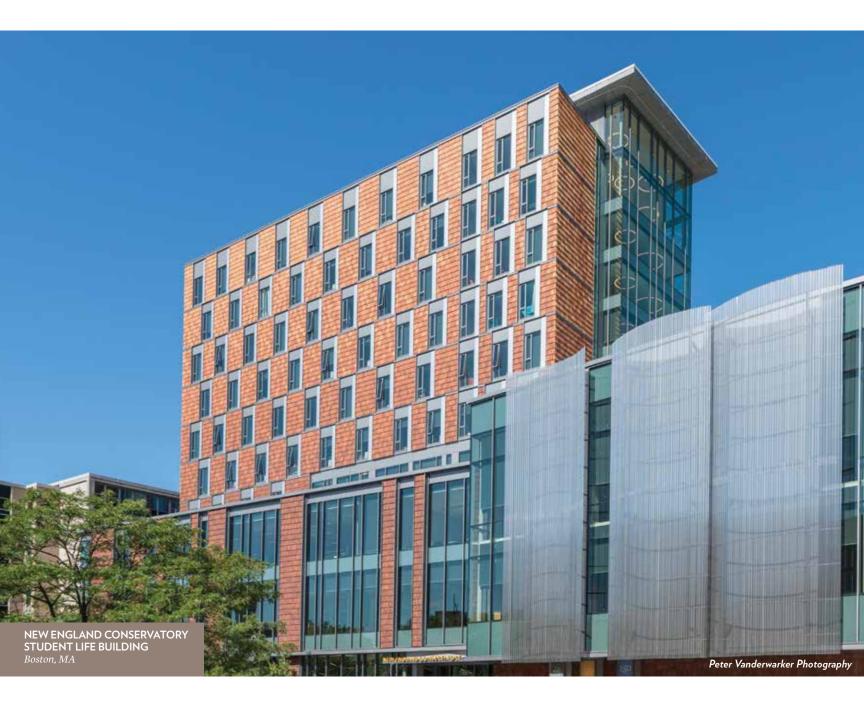

OLD WORLD COLLECTION

If you are seeking old-world charm in a terra cotta roof that's modestly priced, ask about Ludowici's unique Old World Collection. This special collection includes larger dimension barrel tiles and other tile profiles made popular long ago in Europe and Mexico, and treated to look centuries old. Manufactured by TERREAL, sister companies and exclusive partners, the clay tiles come in a range of profiles, colors and sizes and are available through Ludowici.

MODERN USES OF THE MOST TRADITIONAL BUILDING MATERIAL

WALL CLADDING

Through our subsidiary, Terreal North America, Ludowici offers a wide variety of highly innovative terra cotta wall cladding products. Beautiful, durable ventilated facades and terra cotta panels — combined with unsurpassed customization capabilities — offer limitless architectural possibilities for projects in any climate.

SUNSCREENS

Terra cotta sunscreens provide a uniquely beautiful way to absorb and diffuse sunlight from building exteriors, creating an effective barrier against summer heat. Ludowici offers TERREAL sunscreens that come in a wide range of lengths, cross-sections and colors. Tap into our engineers for help designing a shade system that meets the specific functional and decorative needs of your project.

HANDS ON EXPERIENCE

The Ludowici factory is a unique facility blending centuries of craftsmanship and modern-day manufacturing technology.

Visitors are encouraged to come to New Lexington, tour our facilities, work with our experts and see firsthand how our artisans create terra cotta roof tiles, floor tiles and accessories. The Ludowici factory tour is an accredited AIA Continuing Education System program (2 HSW credits).

In an old train-loading building sits Ludowici's Factory of Ideas, a handson, interactive facility where visitors work one-on-one with our experts to select clay tile profiles and colors, build mock-ups at the proper pitch and orientation and view them in different lighting conditions.
